

MFi Certified: Don't Put Apple Devices at Risk

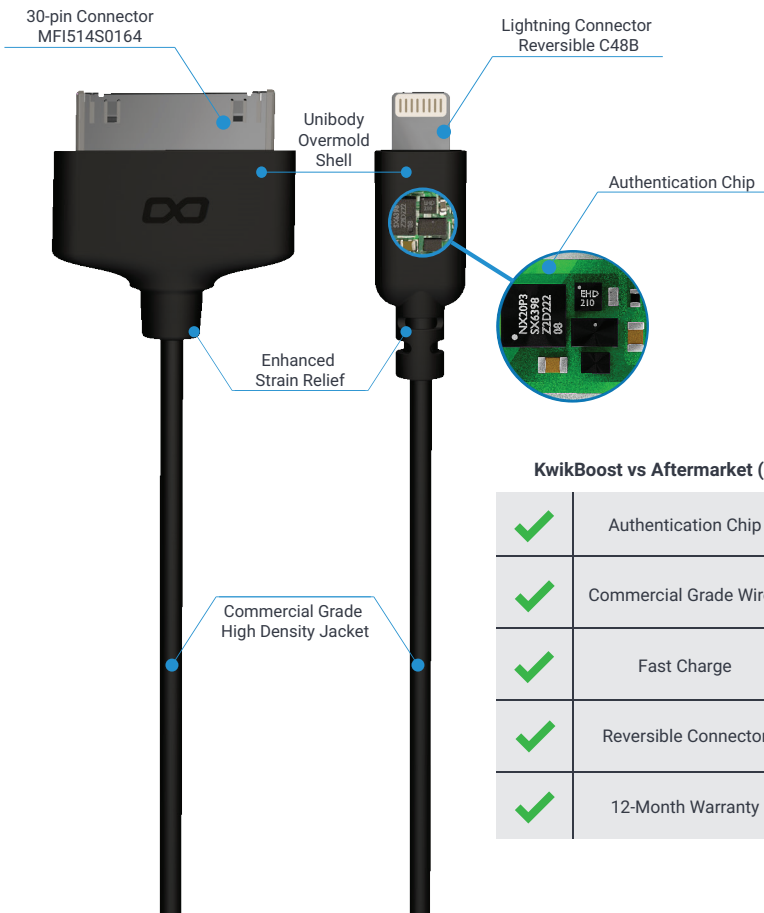

The Apple MFi Certified Program requires that the quality and design of manufactured accessories, like charging cables, are on the same level as Apple's own products. The MFi certification and corresponding Apple Product Plan ID can only be obtained after products pass rigorous tests as a guarantee of safety and reliability for customers and their devices. All KwikBoost products surpass these standards, are designed for commercial use, and deliver the most advanced and innovative MFi functionality on the market today.

GUARANTEED RELIABILITY

KwikBoost cables are made with the highest quality materials and technology to enhance both performance and safety. We back each and every cable we manufacture with a hassle-free 12-month warranty. Apple Product Plan ID 115290-0055.

Know before you buy. Any time you are buying products for commercial use or public locations that will connect to Apple devices, be sure to ask for an Apple MFi contract number. KwikBoost's MFi contract number is MFi-14-00074.

KwikBoost vs Aftermarket (non-MFi)

✓	Authentication Chip	✗
✓	Commercial Grade Wires	✗
✓	Fast Charge	✗
✓	Reversible Connector	✗
✓	12-Month Warranty	✗

Aftermarket, unauthorized cables made by non-licensed manufacturers can not only be harmful to devices, they are not guaranteed to work after software updates. In many cases manufacturers and sellers alike will advertise their cables as MFi certified, even though they are using cloned, unauthorized cables. These non-certified cables are prone to defects, breakage and can be rendered useless by Apple through their regular software updates. The only way to protect against this is to work with MFi-licensed manufacturers and to ask for their Product Plan ID's.
