

10 Reasons nothing beats Bloxx

- 1** Bloxx's unique patented Tru-View Technology (TVT) delivers genuine real-time filtering which means zero second protection – nothing protects like Tru-View. Other companies claim to offer real-time filtering but only Bloxx delivers.
- 2** The Bloxx Web Filter uses an advanced but flexible policy manager allowing you to easily create and manage access policies, such as shopping and social media. Every policy can be set up so access to specific content categories can have time-based quotas.
- 3** The Bloxx Web Filter uses an advanced SSL Proxy, SSLI, to intercept and decrypt SSL traffic to provide protection against HTTPS traffic, encrypted anonymous proxies and malware. Did you know, recent research indicates that up to 80% of UTM's cannot filter SSL traffic!
- 4** Bloxx provides a powerful easy-to-use Web Reporting application - enabling comprehensive report creation which can be customised, pre-defined reporting templates are also available. Our pro-active search alert functionality can also be set up to report on specific terms being requested across your network.
- 5** To ensure that your users have accepted your organisation's acceptable use policy, the AUP Management feature lets you automatically present an Acceptable Use Policy acceptance page to users. To ensure compliance, all acceptances are logged and can be reported.
- 6** Bloxx provides unrivaled flexibility in deployment allowing you to effectively integrate the solution into to your existing infrastructure. Available as hardware, virtual, or Hybrid Cloud, Bloxx easily scales to meet current and future requirements. Appliances can be clustered and load balanced to deal with high volumes of traffic.
- 7** Bloxx Anti-Malware is included as standard, providing extra layers of protection against Web-based threats, including viruses, malware and phishing, all at the gateway level minimising endpoint infection.
- 8** Bloxx support and training is the best in the business - 96% of customers voted our Support 'good' or 'very good'. Bloxx eCampus is our online, on demand training platform with video and audio modules and the option to become Bloxx Certified.
- 9** Bloxx helps organisations significantly reduce Web filtering costs without having to compromise on functionality or performance. Total Cost of Ownership is up to 40% less expensive than other products.
- 10** Bloxx supports Single Sign-On, Google authentication and much more ensuring deployment into a BYOD environment is simple and accurate filtering policies are applied to all devices.
