Dropbox Education

3 reasons to upgrade to Dropbox Education

Over 400 million people use Dropbox Basic or Pro to get work done. To bring business critical information inside your organization's walls, get your entire team on board with Dropbox Education. Employees can use the solution they love and you'll have the control and visibility you need.

✓ Improve collaboration across teams

Work is scattered. When files get spread across multiple devices and solutions, and teams find themselves working across offices, collaboration suffers. Dropbox unites devices, apps, and offices, letting employees easily work with each other and external partners. And advanced features like commenting and the Dropbox badge bring collaboration into the files users work with every day.

- As much space as you need
- Native collaboration inside Microsoft Office
- Unlimited file recovery
- Unlimited version history

Files are spread across 2 devices and 5+ collaboration solutions.*

✓ Get better control over company data

Employees want the tools that help them stay productive. But too many solutions can make controlling company data difficult for IT. Dropbox gives both end users and IT what they need: one centrally managed solution that works with all the apps and devices employees already use.

- Remote wipe
- Comprehensive auditing
- Separate personal and work Dropboxes
- Enterprise solution integrations
- Password-protection and expiring links

More than 50% of employees want to choose the tools they use.*

✓ Simplify Dropbox account management

Managing an education institutoin takes IT time and resources. Dropbox makes scaling easier by giving you administrative control over your entire team's accounts. And with a flexible solution that helps your team stay productive, you can retire outdated technologies — which means more efficient operations.

- Admin dashboard
- Per-user pricing
- AD and SSO integration
- Priority support
- Centralized billing

Dropbox customers average $316,400 in annual bene ts per 100 users.**
