**Dropbox Education**

The most widely used file sync and share product in higher education

Dropbox Education connects your campus with the collaboration tool faculty and students prefer, letting them work anywhere on any device. In addition, enterprise-grade security features give you the control and visibility you need to manage data across campus.

1 in 4

Nearly 1 in 4 university students in the U. S. have personal Dropbox accounts

3,000

Faculty and students in over 3,000 educational institutions worldwide use Dropbox

✓ **No training required**

Already present in over 3,000 educational institutions worldwide and known for supreme usability, there's no training needed when deploying Dropbox Education on campus.

✓ **Enterprise security**

Enterprise-grade management tools help you control information, monitor activity, and manage transition. Dropbox Education meets the requirements for SOC 1, 2, and 3, ISO 27001, and the EU Safe Harbor frameworks.

✓ **Supports the way you work**

Unlike other FSS solutions, Dropbox works with any device or operating system across desktop and mobile, online or offline. Dropbox also hosts the largest repository of Microsoft Office files and integrates with Office 365.

Works with everything: with more than 300,000 apps on the Dropbox Platform, faculty and students can work together with the programs they already use
