Dropbox Business

Why teams use Dropbox Business with Autodesk

For decades, Autodesk has enabled designers, engineers, and construction teams to build their best work. And when they need access to those files in the field or on the go, organizations turn to Dropbox Business for anytime, anywhere editing and collaboration. Together, Dropbox and Autodesk have teamed up to provide a best-of-breed solution for our users.

✓ Increase mobile productivity

- Accurately preview project schedules, blueprints, and change orders without downloading the file, or even the software.

- Upload and share photos directly from the worksite back to the office to keep a record of progress and track changes with unlimited version history.

- Streamline approvals with native commenting to keep stakeholders up to date.

✓ Sync large files faster

- Delta, LAN, streaming sync technology allows Dropbox to sync files quickly and reliably, whether you're in the office or on site.

- Maintain a central repository by storing all files, not just CAD files, in one place, so your team can spend more time working on their files and less time searching for them.

✓ Secure your creative work

- 256-bit AES encryption protects data in transit and at rest, so your most important IP is always protected.

- Comprehensive audit logs give IT the tools to monitor internal and external sharing proactively.

- Remote wipe and account transfer enable IT to recover data from external contractors and clients once projects are finished.
